

Claims

1. Material (1) made up of at least a first (2) and a second (3) sheet each having two opposite faces (21, 22, 31, 32) designated as front (21, 31) and back (22, 32) faces, at least one (21, 31) of these faces being intended to
5 bear legible printed information (4), constituting a text (4) for example,

this material being characterised in that, in addition to the printed information (4), at least one of said front faces (21, 31) bears legible information (5) which, distinct from the printed information (4), is made up in the form of reliefs (51) which appear to be superimposed on the legible printed
10 information (4).

2. Material according to claim 1, characterised in that the information in relief (5) is formed by local deformation along the thickness of at least one of the first and second sheets (2, 3).

3. Material according to claim 1, characterised in that the information
15 in relief (5) is formed by deposit of an element in relief (52) on at least one of said front faces (21, 31) of at least one of said first and second sheets (2, 3).

4. Material according to claim 1, characterised in that the information in relief (5) is composed by local modification of the state of the surface of at least one of said front faces (21, 31) of at least one of said first and second
20 sheets (2, 3).

5. Material according to one of the claims 1 to 4, characterised in that the material (1) includes a single sheet (2) constituted by one (2) of said first and second sheets (2, 3), and the printed information (4) as well as the information in relief (5) are borne by this sheet (2).

25 6. Material according to one of the claims 1 to 4, characterised in that it includes at least two sheets (2, 3) constituted by said first and second sheets (2, 3), of which:

- said first sheet (2) is made up of opaque material and whose said front face (21) bears the printed information (4),

- said second sheet (3) is made up of transparent material, and

5 • on the one hand, at least whose said front face (31) bears the information in relief (5), and

• on the other hand, is superimposed on the front face (21) of the first sheet (2) that bears the printed information (4).

7. Material according to one of the claims 1 to 4, characterised in that it includes at least two sheets (2, 3) constituted by said first and second
10 sheets (2, 3) of which:

- said second sheet (3) is made up of opaque material and whose said front face (31) bears the information in relief (5),

- said first sheet (2) is made up of transparent and flexible material
<and>

15 • bears the printed information (4) at least on its front face (21),
and

• is superimposed on the front face (31) of said second sheet (3) which bears the information in relief (5).

8. Material according to one of the claims 1 to 4, characterised in
20 that it comprises at least two sheets (2, 3) constituted by said first and second sheets (2, 3), of which:

- said second sheet (3) is made up of opaque material and whose said front face (31) bears the information in relief (5),

- said first sheet (2) is made up of opaque and flexible material, and

- bears the printed information (4) at least on its front face (21),

and

- is closely superimposed on the front face (31) of said second sheet (3) which bears the information in relief (5).

5 9. Packaging comprising a receptacle, characterised in that this receptacle is made up at least in part of a material according to any one of the claims 1 to 8.

 10. Inner lining for a receptacle, characterised in that it is made up at least in part of a material according to any one of the claims 1 to 8.

10 11. Outer wrapping for a receptacle characterised in that this outer wrapping is made up at least in part of a material according to any one of the claims 1 to 8.
